1273	Redundant; see RR1268 above
1274 - 1304	Redundant; the VGE has recommended highly simplified provisions to replace all the material relating to the "RR1218 procedure" under which certain administrations may obtain the help of the Bureau in finding assignments for their fixed service in bands below 28 000 kHz. The texts are given in Nos. 5.8, 5.8.1 and 7.2. The procedure to be followed by the Bureau should, under No. 5.8.1, be developed in the ROP in accordance with Article S13 of the Simplified Procedures

<b>ARTICLE 12 (cont.)</b>	
1386 - 1415	The VGE has recommended that material not requiring treaty status should be removed from the RR. All this material relating to findings by the Bureau and the sources of the dates to be entered into the Master Register can therefore be moved to the ROP. The VGE has also recommended that, in principle, the Register should contain only two dates against each assignment - the date of receipt by the Bureau of the complete notice of the assignment concerned and the confirmed date of putting the recorded assignment into operation. Further, the VGE wishes to see symbols to indicate the status of each assignment as it is defined in Article 2 of the Simplified Procedures covered in the ROP <b>N. B.:</b> RR1409 - SUP by WARC-92

<b>ARTICLE 14A</b> (cont.) 1633 - 1644	If the WRC-95 decides that, in the interests of simplification, it is no longer necessary to continue the ITU frequency coordination for NAVTEX operations, then No. 3.4 n) can be removed and the frequencies 490 kHz, 518 kHz and 4 209.5 kHz can be listed under Nos. 5.5 and 8.1 c) of the Simplified Procedures. If the WRC-95 believes that it is necessary to continue coordination of frequency usage of 490 kHz, 518 kHz and 4 209.5 kHz for NAVTEX, in addition to the operational coordination required to be carried out through IMO, IHO and WMO (see Resolution 329), it is recommended that Article 14A be assumed to cover all the three frequencies and that its procedure be subsumed within the standard frequency coordination procedure of Article S9. (to Part A)

**Comparative Tables of the Provisions of Article 16 and  
Appendices 30 and 30A to the Simplified RR numbers**

These Tables have been prepared to demonstrate the feasibility of substituting Article S10 of the Simplified Procedures for Article 16 of the Radio Regulations in relation to Appendix 25 and the extent to which Article S10 and other provisions of the Simplified Procedures might be adopted to simplify the regulatory procedures of Appendices 30 and 30A. The references in the Tables under the column "Recommended Disposition" are to the paragraphs of the Simplified Procedures.

<b>Article 6, Section I</b>	
6.1.1 - 6.1.12	Covered by Article S9 (see No. 3.4 m)) and Appendix S5

**Editorial Note 1 :** The provisions of Nos. 5.2.1 c), 5.2.1.d), 5.2.2.1, 5.2.2.2 and 5.2.6 of Appendix 30 are not covered by the Simplified Procedures. If WRC-95 agrees, on the basis of the Comparative Table, that the feasibility of using Articles S10 (plan modification) and S11 (notification and recording of frequency assignments) is otherwise sufficiently demonstrated, special means could be found to accommodate these omissions, possibly in Appendix S6.
